

Why owners can't delegate contractor safety to other parties

THE RISKS ARE TOO BIG

Inconsistency

Understanding how safety is managed in various geographies and projects becomes challenging due to the distinct processes followed by each contractor.

Litigation & Liability

Contracts offer financial protection but there is no avoiding the liability that can come from high-risk projects and high-risk work.

Reputation

When an incident occurs on your project, reporters rarely mention the GC or contractor involved. Staying out of the headlines requires your active participation to mitigate incidents.

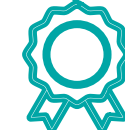

THE POTENTIAL ROI IS MASSIVE

Safety incident cost reduction

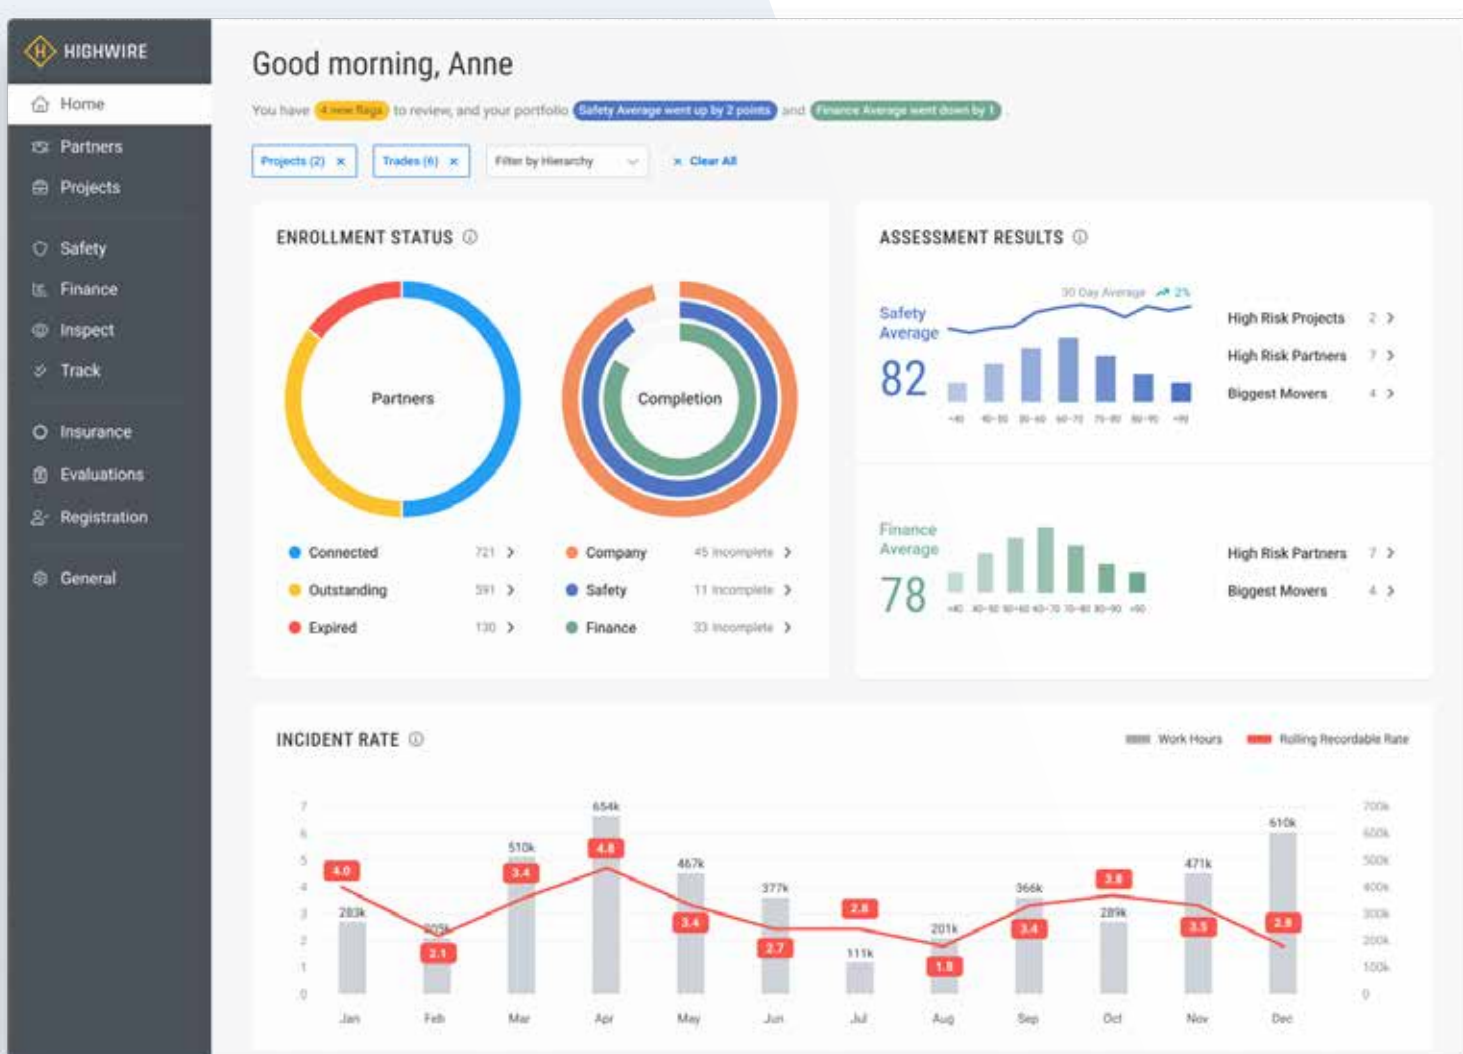

Lower insurance costs

Protect your brand

THE TOP PERFORMING OWNERS GET INVOLVED AND DEMAND VISIBILITY

Contractor Insights

Automatically assess contractors, track behavioral and incident trends, and benchmark contractor performance across all your projects.

Safety Culture

Your safety culture is only as strong as your enforcement. Set the standard for the culture you want to protect the brand you've built.
